EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- a) Page 1, line 6 of the specification, after "wheels" insert - - . - -

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The JP 2000033331 discloses an automated system for removing excess powder from aluminum wheels using an optical detector to record the position of the wheel and transmits the information to a controller which controls the position of a robotic arm equipped with a suction device to remove the excess powder from the wheel holes. However, from a translation of the publication there is no teaching or suggestion of an electronic came capable of recording the axial and angular position of the wheels, a movement device which is capable of guiding the suction head onto the powder-coated surface of the wheel and of moving it a certain distance in contact with the wheel at the speed of the wheel, or a controller which transmits the axial and angular position of the wheel to the movement device with a time delay corresponding to the pass time of the wheel between the recording station and the suction station.
